Yorkville Speaker 800W

\$100.00

EF500P - Powered Speaker - 800w, 15 inch / 2 inch

The **EF500P** redefines performance in a high-power professional active loudspeaker enclosure. Utilizing the popular **Ä@lite EF508** as a base, and adding a total of 800 watts of bi-amped power and advanced signal processing, the **EF500P** is destined to set a new standard for active loudspeaker design. The woofer or low frequency amplifier uses Class D switching technology to reduce overall weight of the amplifier section. This amp delivers over 650 watts to the 15" woofer. A 150 watt two-tier linear technology class H amplifier drives the 2" titanium diaphragm horn driver. This solution allows the horn to produce loud clean transients to keep up with the high output of the woofer. The two-tier amplifier technology isn't typically seen in a product like this, however we found the advantages (lower weight, more efficiency, higher headroom and lower operating temperature) made it a perfect choice for powering the top end.

- Strong plywood cabinet patterned after our proven EF508
- Ultra-clear reproduction throughout bandwidth
- Lightweight, high efficiency, high tech, 800 Watt Bi-amped power module
- Proven TX style processing and component protection
- True 2" Titanium diaphragm horn driver
- Proven low distortion / high power handling 15" woofer
- +/- 6dB input trim control for individual cabinet level adjustment
- XLR and TRS inputs / outputs for easy connection and looping
- Multi-input source mixer for direct inputs
- Direct microphone input with level control
- Two way overall EQ controls
- Integrated flying hardware (3/8" threaded holes)
- Tough, full length metal grille
- Recessed Mixer panels

Yorkville's Ä@lite series loudspeaker systems are the result of years of research, pushing the limits of modern state-of-the-art sound reinforcement technology. Engineered for the serious pro audio user, Ä@lite

systems are among the most advanced, most versatile and most efficient high powered portable P.A. boxes available.

THIS SPEAKER CAN HANDLE AN EVENT WITH UP TO 300 PEOPLE (Per Speaker!)

Add an additional speaker, and a pair of [YORKVILLE SUBWOOFERS](#), and you have a system that can perform for up to 1000 people with minimal technical effort!
