## LS800P - Powered Subwoofer, 1500w, 1x18 inch

First choice in active subwoofers, the LS800P combines a cast-frame, neodymium-based 18-inch bass driver with a rear-loaded bass horn enclosure made from 15mm birch ply covered in rugged black carpeting (black ultrathane-painted version "LS800PB" is also available). Now add 1,500 continuous Watts of onboard power featuring full-time "invisible" limiting. Result - a rugged, high-powered "earth mover". Balanced XLR inputs are included along with 1/4-inch TRS inputs which, at the push of a button, can handle either line-level or speaker-level signals (you can simply connect it to any full-range speaker for quick and easy setups).. Connections also include both XLRM and 1/4" Output Link jacks for interconnecting up to 10 LS800Ps in larger concert systems. An additional XLR 'Mono Blend Input' allows the LS800P to function in a stereo system by blending the balanced L & R signals from a stereo mixer and creating a single in-phase mono signal.

The control panel features a +/- 12dB Level pot for matching the LS800P's output with the rest of the system, a tunable 90 to 150Hz HF Roll off pot to let you match the LS800P to any full-range enclosure without an electronic crossover, a unique Shape control that modifies the bass response, a Line/Speaker Input Level button and LEDs to indicate Power, Limit and Clip.

Hardware includes four steel inset handles, a steel top-mounted pole-stand adapter, a heavy-gauge curved steel grill and tilt-back wheels
